## 1 Before we get started...

Please note the following:

- This documentation assumes that you are familiar with your computer and its operating system. In case of any questions concerning the operating system consult your operating system's documentation.
- The menus, menu commands, and program properties described in this documentation are based on a full program version with all licensable program modules and administration rights.
- Due to the set license-configuration not all program functions described may be available to you.
- The illustrations in this documentation may differ from the corresponding dialogue fields of your current program version. This does not affect your work with the described software, however.

The following font styles are used for clarification:

for menu commands
for tabs, panels, and buttons
for keys and key combinations
for emphasis in the text
entry values made by the user

The following icons in the margin serve to facilitate your orientation:

Special information on software operation.

Warnings for actions that could have undesired effects.

Useful hints that can make your work easier.

Frequently asked questions and problem situations.

## 2 General information

The **AI BIDDING**COCKPIT enables simultaneous researching tenders on several platforms. It also allows you to download and view tendering documents in a single application.

**AI BIDDING**COCKPIT is a **single workplace solution** for editing tendering documents and submitting digital bids. Collaboratively working on a tender is not part of its functionality. For a **manual** forwarding of already edited tenders, please read the notification on how to EXPORT TENDERS in chapter Tenders

The software supports you in composing and editing the bidding data and enables you to submit encoded bids to your client. These are qualified and signed according to the German (and Austrian) signature law.

For a legal signature you require an advanced electronic signature with a soft certificate or a qualified electronic signature according to the German signature law and the corresponding PIN number. Furthermore, you need a card reader and a smart card. You will find a detailed list of all signature cards and card readers supported by the **AI BIDDING**COCKPIT in the "User documentation signature card and cardreader" document. Depending on the file format used by the awarding authority for composing the tendering documents it might become necessary to visualize these with an according tool that runs independently from the **AI BIDDING**COCKPIT.

Furthermore the application requires a Java runtime environment, as is usually included in modern Computer-systems by default.

You can also use the **AI BIDDING**COCKPIT for editing and printing tendering documents, of course.

The **AI BIDDING**COCKPIT is also a multiplatform bidding client, which supports the XVergabe standard for bid submission of the eTendering Portal of the Federal government.

Communication via SSL should be possible from the bidder network. A (transparent) proxy configuration is also possible.

## 3 Starting the application

Start the **AI BIDDING**COCKPIT directly from the corresponding tendering portal using the OPEN FILES IN **AI BIDDING**COCKPIT link.

Details ab	out this tender: EPO-2019-0027, Cleaning services

Figure 3.1: Start the AI BIDDINGCOCKPIT from the Tendering Portal

Using the advanced WebStart installation mechanism you are always up to date to the most recent version of the application and can start it comfortably from your desktop.

When you are starting the program for the first time, you first have to confirm the **Terms and conditions**. Then, an additional window opens, where you have the possibility to learn about the latest patches.

Figure 3.2: Display changes in the AI BIDDINGCOCKPIT

You can access this information at any time using the menu INFO / SHOW ALTERATIONS.

## 4 Program window

The program window of the **AI BIDDING**COCKPIT contains several areas. Above the window title, there are MENU ENTRIES (1) on the left and right. On the left side of the window, six symbols are assembled which represent the FUNCTIONAL AREAS (2) of the **AI BIDDING**COCKPIT. Depending on the activated area (blue font), different REGISTERS (4) are displayed, located centrally to the right hand side in the application panel (3). You can tell the active register by its white backgrounded head. Most registries contain a FILTER BAR(5), which allows you to change the list of displayed entries. By using the FILTER bar, you can limit the displayed list. Update the entries with the SYNCHRONIZE button. Click on DELETE FILTER ENTRIES to remove the entry in the FILTER field.

Figure 4.1: Program window of the AI BIDDINGCOCKPIT

The following chapters describe the functional areas of the AI BIDDINGCOCKPIT in detail.

## 5 Menu bar

The **AI BIDDING**COCKPIT has only three menu items containing only few entries each. These can also be selected using keyboard shortcuts. You can press the [ALT] button along with the underlined letters of the menu names, e.g., [ALT] + [F] and then [ALT] + [I] to open the menu <u>FILE</u> - <u>IMPORT TENDER</u>.

Press [CTRL] and [SHIFT] as well as the underlined letter from the menu to open menu items from anywhere in the **AI BIDDING**COCKPIT application. For example, press [CTRL]+ [SHIFT]+ [R]to create a bug report

In the following, you will find the menu items, their meaning and the existing shortcuts. The underlined letters correspond to the default setting shortcuts.

### 5.1 Menu item - FILE

Menu item	Symbol	Meaning
IMPORT TENDER <u>A</u>		Opens the window <b>Import file</b> . The tendering documents in the *.bcd or *bcf format can be added to the current list of tenders if you are a participant of this tender. Shortcut: [ALT] + [A] or or [CTRL] + [SHIFT] + [A]
<u>S</u> AVE ALL	-	Saves the current data in the local directory. Shortcut: [ALT] + [S] or [CTRL] + [SHIFT] + [S]
G <u>O</u> OFFLINE / ONLINE	(2)	Activates the offline or online mode. The OFFLINE status is displayed on the upper right hand corner of the window near the INFO menu. A data synchronization can optionally be carried out when switching the status. Shortcut: [ALT] + [O] or [CTRL] + [SHIFT] + [O]
CLOSE APPLICA- TION <u>B</u>	P	Closes the program. Shortcut: [ALT] + [B] or [CTRL] + [SHIFT] + [B]

### 5.2 Menu item - EDIT

Menu item	Symbol	Meaning
VERIFY SIGNATURE	\$	Opens the <b>Perform compatibility check</b> panel. Here, you can import a signed file and test whether your card reader and signature card are compatible to the <b>AI BIDDING</b> COCKPIT. The results open in a separate window. See chapter Implement test signature. Shortcut: [ALT] + [V]

Menu item	Symbol	Meaning
IMPORT	<b>1</b>	Opens the Open file panel. You can open a specification sheet
SPECIFICATION		from the <b>AI TENDERING</b> MANAGER, enter values and save them.
SHEET ( <u>L</u> )		If necessary, you can also export this file.
		See also the chapter Specification sheets.
		Shortcut: [ALT] + [L]

## 5.3 Menu item - INFO

Menu item	Symbol	Meaning
USER MANUAL	<u>با</u>	Opens the user manual in digital form. Shortcut: [ALT] + [U] or [CTRL] + [SHIFT] + [U]
SUPPORTED SIGNATURE <u>C</u> ARDS	<u>L</u>	Opens the documentation of signature cards of the <b>AI BID-</b> <b>DING</b> COCKPIT website. https://www.bietercockpit.de/res/ docs/AI-BC_Signaturkarten_Kartenleser.pdf Shortcut: [ALT] + [C] or [CTRL] + [SHIFT] + [C]
FREQUENTLY ASKED QUESTIONS	P	Opens the FAQ area of the <b>AI BIDDING</b> COCKPIT website. https://www.bietercockpit.de/bietercockpit/faq.html Shortcut: [ALT] + [Q] or [CTRL] + [SHIFT] + [Q]
SHOW ALTERATIO <u>N</u> S	Q	Opens the alterations area of the <b>AI BIDDING</b> COCKPIT website. https://www.bietercockpit.de/bietercockpit/ neuerungen.html Shortcut: [ALT] + [N] or [CTRL] + [SHIFT] + [N]
CREATE ERROR REPORT	<b>ð</b>	With this option, you can document, send an occurred error to the manufacturer support and save it locally. Shortcut: [ALT] + [R] or [CTRL] + [SHIFT] + [R]
ABOUT AI BID- DINGCOCKPIT	<b>i</b>	Program and manufacturer information. Shortcut: [ALT] + [A] or or [CTRL] + [SHIFT] + [A]

## 6 Settings

This area contains the registries PLATFORMS and GENERAL. These allow adjusting the settings, which are essential for flawlessly operating the **AI BIDDING**COCKPIT.

### 6.1 Platforms

The table PLATFORM CONFIGURATION contains all your configured platforms within the **AI BIDDING**COCKPIT. They are activated for search by default.

You can adapt the displayed list to your wishes by typing in the FILTER field. Delete your entries, if necessary, with the REMOVE FILTER button.

🖳 Platfor	ns 💮 General				
He	e vou can configure already connected :	tendering portals			
Please select a single tender on a new tendering portal and open the documents with the link "Open documents with <b>AI BIDDING</b> COCKPIT" in order to connect the <b>AI BIDDING</b> COCKPIT with this portal. Subsequently you will be presented various options of configuration.					
Platform con	iguration	Filter:			
Tenderin	) platform, additional information		Active  Actions

Figure 6.1: Settings - Configure platform

Click on the TRIANGLE symbol in the ACTIONS column to display the list of available actions for the selected platform.

Figure 6.2: Platforms - List of available actions

The first entry in this list is the predefined action, which can also be opened by **double-clicking** on the corresponding row in the platform overview. The symbol on the left of the triangle - CHECKMARK or BAR - shows which action is currently available.

In the following, all available actions and their meanings are listed in one table. The underlined letters correspond to the pre-set shortcuts and are only active when the list is opened.

Action	Meaning
Activate or Deactivate platform	Can be changed by double-clicking in the overview. Deactivated platforms are not included in the data synchronisation. Shortcut: [ALT] + [A] / [ALT] + [D]
<u>C</u> onfigure platform	Opens the <b>configuration panel</b> , see the explanations below. Shortcut: [ALT] + [C]
Register on the platform	Forwards you to the website of the corresponding platform. Here you can register as a bidder. The user name does not have to be identical to the users name on the <b>AI BIDDING</b> COCKPIT. Shortcut: [ALT] + [R]
Delete platform	Deletes the corresponding entry from the list. Shortcut: [ALT] + [D]

Select the action CONFIGURE PLATFORM to carry out the configuration settings for the selected platform. An entry panel opens up.

Platform cor	nfiguration		$\times$	
1	In this dialogue, you can configure the connection to the platform. Please note that you have to be registered as a valid user on the corresponding platform.

	Password:			
		Access tenders on this platform		
	🚷 <u>T</u> est conne	ection Save Cancel		

Figure 6.3: Settings - Platforms - Configure platform

Here, you can enter the login details of your **platform user** and verify the login on the selected platform with the TEST CONNECTION button.

After a successful connection test an info message is displayed to you.

		×
Ũ	The connection test has been successful!	
	📀 ОК	

Figure 6.4: Notification after a successful connection test

Activate the checkbox RETRIEVE TENDERS FROM THIS PLATFORM to see all your tender participations on this platform in the TENDERS area and also to include the platform in the **AI BIDDING**COCKPIT synchronization.

Select DISPLAY SEARCH RESULTS FOR THIS PLATFORM, if you would like to include this platform in your tender research. After you have made your selection, click on SAVE to save your settings.

You can identify an activated platform by the CHECKMARK in the ACTIVE column. The MAGNIFYING GLASS symbol in the SEARCH column appears if the platform has been activated the tender research.

If synchronizing a tendering portal becomes necessary due to changes, the following message is displayed.

Figure 6.5: Notification after finishing the platform configuration

### 6.2 General

This registry contains several areas (GENERAL SETTINGS, PROXY SERVER CONFIGURATION, GAEB CONFIGURATION) which are separated by horizontal bars with different symbols. You can identify the currently displayed area by the MINUS symbol on the right of the separation bar. Areas which are currently hidden display a PLUS symbol here.

Switch the displayed area by clicking on the separation bar. The content will be moved upwards or downwards and will be displayed beneath the separation bar.

#### 6.2.1 General settings

In this area user-specific data can be adjusted.

Platforms	🍻 General		
🖗 General settings			
Temporary work fold	er

#### 6.2.1.1 Temporary Working Directory

If you are starting the **AI BIDDING**COCKPIT for the first time, a notification dialogue is displayed. This dialogue informs you about the existence and functionality new temporary workspace or directory. After this directory is created this note will not be displayed again.

Important Not	tice! - Temporary work folder	×
1	A folder has been created, where <b>AI BIDDING</b> COCKPIT temporarily saves your bidding and participation application files during your active work. This allows you, aside from the recommended editing of these files from <b>AI</b> <b>BIDDING</b> COCKPIT, to also make use of other tools. Saving or overwriting these files in these procedure specific work folders is thereby explicitly desirable.	,
	Please note, that from the user's point of view, the content of this folder will be deleted entirely everytime <b>AI BIDDING</b> COCKPIT is closed. Your work status and data will, however, still be stored and acessible for <b>AI BIDDING</b> COCKPIT, but as a technical file which will ultimately be also used for the	
	submission of a bid or an application.	
Ś	By default the temporary folder is in: C:\Users\hpelz\BCockpit\My Bids This path can however be changed via the menu "Settings", e.g. if collaborative work on a network drive is desired.	
	🖉 O <u>k</u>	

Figure 6.7: Warning: missing temporary workspace

Ä
---

Please note that this directory is cleared each time a tender is closed. Make sure to edit your files using the functions of the **AI BIDDING**COCKPIT.

You can always change this directory in the TEMPORARY WORKING DIRECTORY. If the selected directory cannot be found during the program start, the following notice is displayed:

Figure 6.8: Temporary workspace warning

#### 6.2.1.2 Software Certificate

In the general settings of **AI BIDDING**COCKPIT under SOFTWARE CERTIFI-CATE you can store a signature document in \*.p12 or \*.pfx format. When signing your tenders, you will save time by being able to enter the password directly.

#### 6.2.1.3 Tendering Files Directory

Select a directory for saving local files of the **AI BIDDING**COCKPIT under TENDERING FILES DIRECTORY. The *Cockpit/bcf* directory within the repository of the currently logged in user is pre-set.

In order to change this directory click the SELECT panel. The **Select directory** panel opens. Choose a directory and confirm your selection with OPEN. The changed directory path is displayed in the text field to the left. Confirm these changes with OK.

#### 6.2.2 Proxy server configuration

In the PROXY SERVER CONFIGURATION area you can configure your proxy server for the internet connection in the **AI BIDDING**COCKPIT. The setting DIRECT CONNECTION TO INTERNET is pre-set.

Select AUTOMATICALLY DETECT PROXY SETTINGS so that the **AI BIDDING**COCKPIT can automatically use the present configuration on your system.

If you want to manually set up a Proxyserver, activate the control panel CONFIGURE PROXY MANUALLY. Now you can enter the host address and the port. If your proxy server needs an authentication enter the access data (USERNAME and PASSWORD) here.

Using a proxy exception list, you can define addresses to which the proxy settings should not apply. It is possible to add a single record or an entire exception list seperated by commas.

Figure 6.9: Settings - General - Proxy server configuration

#### 6.2.3 GAEB configuration

All tenders abiding to the German Construction Procedures contain a specification sheet in GAEB format which must be filled in by the bidder and submitted along with the bid.

GAEB stands for the German Gemeinsamer Ausschuss Elektronik im Bauwesen (Joint Committee for Electronics in Construction). This committee seeks to create a standardized language for all parties involved in construction processes.

The **AI BIDDING**COCKPIT generally offers two different methods of editing a GAEB file: First, editing the GAEB file (D83 or X83) directly from the **AI BIDDING**COCKPIT via the GAEB software wingaeb xml. Second, the use of an external GAEB application (e.g. California Pro, RIB Arrbiba etc.). Both variants require a different handling in editing the GAEB file and will be described in more detail in the following chapters.

In SETTINGS-GENERAL-GAEB CONFIGURATION you can specify whether you want to use wingaeb xml or an external program for editing GAEB files. It is recommended to use wingaeb

xml, as the integration in the **AI BIDDING**COCKPIT simplifies the overall process of bid creation and moreover, the bidder is supported by various test mechanisms.

Platforms General	
🛞 General settings	
<b>Q</b> Proxy server configuration	
🖷 GAEB configuration	
Here you can customize your settings for editing GAEB files. AI BIDDINGCOCKPIT offers an integrated solution for completely editing and validating GAEB files under Wind Users of the AI BIDDINGCOCKPIT can download and use this application free of charge. In this way, you will be actively supported while editing GAEB files and bid submissions. After installing wingaeb xml, you can select "WinGAEBX.exe" via the interface from the installation directory gives the interface from the interf	ws using wingaeb xml by Schnittstelle BAU. en below.
Of course, you can still edit GAEB files using your own AVA software (required, for example, if you are using M	ac OS).

Your selection can be changed at any time. Changes do only apply to tenders which have been edited after the change.

#### 6.2.3.1 wingaeb xml

**wingaeb xml** by Schnittstelle BAU is a software for editing specification sheets in GAEB-format and is provided to you by the **AI BIDDING**COCKPIT free of charge. You can download the most recent version under http://www.wingaeb.de/.

The use of wingaeb xml for editing GAEB files has some advantages compared to the use of an external GAEB application:

- It is possible to edit the GEAB file directly from the AI BIDDINGCOCKPIT
- · You are supported by various test mechanisms for the correct bid submission
- The GAEB application wingaeb xml is provided free of charge for users of
   AI BIDDINGCOCKPIT

In order to use **wingaeb xml** you have to download <u>and</u> install the program. By clicking the link on the right of DOWNLOAD FROM WINGAEB XML, the download of the installation file is initiated. Save the file locally to your Computer.

Figure 6.11: Selecting an installation directory for the wingaeb xml installation in the settings

Having installed **wingaeb xml** you will need to select a directory for the installed software. The directory selected by default is recommended. Subsequently, **wingaeb xml** can be used for editing GAEB-files and can be opened directly from the **AI BIDDING**COCKPIT.

💼 Select file					×
Look in:	📙 wingaeb x	ml	~	🏂 📂 🛄 •	
Zuletzt verw	RegWriter WinGAEB	exe X.exe			
Desktop					
	File name:	WinGAEBX.exe			Select
Dokumente	Files of type:	Executable file (*.exe)		$\sim$	Cancel

Figure 6.12: Selecting a path for the wingaeb xml installation in the file selection dialog

The GAEB-2000-format (P83-file) is not supported by **wingaeb xml** due to little distribution on the market. If you need to edit such a file, it is recommended to use the setting USE EXTERNAL PROGRAM FOR EDITING GAEB.

The **wingaeb xml** software is used internally by the **AI BIDDING**COCKPIT for various test mechanisms. Therefore, you should neither remove nor uninstall wingaeb xml if you would like to continue using the validation functionalities of the **AI BIDDING**COCKPIT.

When creating a new bid, an \*.off file is created from the P83/D83/X83 file in the tendering documents. By double-clicking this file or using the context menu command OPEN FILE in the ACTIONS column, **wingaeb xml** is started and the file can be edited.

💷 🧊 Bid 4	Version 2	1.6 MB	23.08.2018 14:03:44	Edited	Submit 💌

Figure 6.13: Opening a GAEB file using the context menu

When opening a GAEB file via **wingaeb xml** for the first time within a bid, a notification is displayed as a warning not to close the **AI BIDDING**COCKPIT during the editing process of the GAEB file. You can turn off this notification by clicking on the control panel on the left.

Editing GAE	B files	Х
A	Note	
	It is not possible to perform additional actions on the Biddingcockpit while editing GAE files. Once you close WinGaeb these actions become available again.	3
	Do not show this dialogue again	
	✓ O <u>k</u>	

Figure 6.14: Information note while editing a GAEB file via wingaeb xml

After successfully edited the GAEB file, please save the file via wingaeb xml. The **AI BID-DING**COCKPIT recognises the file automatically as a D84/X84 file and overwrites the placeholder file. With the correct operation the D84/X84 file finally has the appropriate file size. During the bid submission, **wingaeb xml** is opened in the background and an automatic validation of any created bidding files occurs. Potential errors are displayed in step 1 of the **bid verification**. For example it is checked, whether the bidding sum equals the sum from the D84/X84 file.

Figure 6.15: Attention note during tender evaluation in wingaeb xml

The bid submission may occur only after the GAEB file has been edited. Further steps of the submission are described in the chapter Digital bid submission.

Should any questions regarding program functions arise, use the integrated online help of **wingaeb xml** or please contact directly the support of **Schnittstelle BAU**.

#### 6.2.3.2 External software

If you are already using a GAEB program which enables you to integrate further applications, you can also use your personal favourite software for editing GAEB files within the **AI BIDDING**COCKPIT. The verification mechanism which checks the specification sheet for its completeness is, however, omitted in this case.

Activate the GAEB CONFIGURATION in register GENERAL. Now select USE EXTERNAL PROGRAM FOR EDITING GAEB FILES.

When you have decided on an external performance recording program within a Regulations on Contract Awards for Public Works and Constructions (VOB) procedure, you will have to export the D83/X83 files from the tendering documents and subsequently open them with the external software in order to save them as D84/X84 files.

Select the according context menu within the tendering documents in order to export.

Tender documents 1

The D84/X84 file can be opened via an external software after the import. A correction of the GAEB file is possible as well.

#### 6.2.4 Language settings

Here you can change the language settings for the **AI BIDDING**COCKPIT to **English**.

After an automatic restart, the entire application will be set to English. This also includes all menu options and the integrated online help.

### 6.3 Specification sheets

In this area, you can edit specification sheets which are saved as software-specific \***.aidf** files. You can then export them in order to use them in further applications.

Figure 6.17: Specification sheet area

Open a specification sheet by clicking the corresponding button in the separation bar (see red circle) or use the menu command EDIT - OPEN SPECIFICATION SHEET.

After adding a specification sheet, the current storage location of the file is displayed in blue font. Your changes are applied to this location as well. If the storage location of a specification sheet has changed after the import, the list entry is displayed in grey font and you can delete it with the DELETE command.

The following table contains an overview of all possible symbols, buttons and their meaning.

Symbol / Action	Meaning
	Opens the <b>Open file</b> window. The file type is <b>*.aidf</b> by default.
<b></b>	Symbol of the specification sheet in the *.aidf format.
<b>1</b> 5.05.2014 13:45	Date and time of the last change to the specification sheet.
	List of available actions. The left symbol displays the command which can be executed by <b>double-clicking</b> .
<b>7</b>	<b>Detail view</b> : Opens the specification sheet for editing. You will find further information on this subject in the bid creation area of chapter Specification sheets. Shortcut: [ALT] + [D]
	<b>Export</b> : Opens the Save file window. The specification sheet is saved as an *.aidf file. Shortcut: [ALT] + [E]

Symbol / Action	Meaning
	<b>Delete</b> : The specification sheet will be removed from this area. This does not affect the
	original file on your computer.
	Shortcut: [ALT] + [L]

### 6.4 Archive

You can move every tender from the TENDERS area via the context menu by right mouse click to the ARCHIVE. The corresponding notification will be displayed before moving the files.

The archived tenders are not affected by the synchronization of the **AI BIDDING**COCKPIT and therefore the processing times are shortened. You can still open and search tenders in the archive or - if necessary - remove them from the archive in order to edit them again in the TENDERS area.

Archived tenders			Filter:	<b>&gt;</b>	1 🛞

	The tender will be transferred to the archive. Archived tenders are not synchronized				
	anymore.				
Add to archive	Shortcut: [ALT] + [A]				
	Opens the <b>Reload tender</b> window. Deletes the local data of the tender on your				
	computer and synchronizes the tender with the platform.				
<u>R</u> eset tender	Shortcut: [ALT] + [R]				
	Opens the <b>Import file</b> window. A tender in *. <b>bcd</b> or *. <b>bcf</b> format can be imported to the				
÷	AI BIDDINGCOCKPIT.				
	Delete filter.				
8	Synchronize. Compares the messages with the information on the tendering portal.				

In order to open a tender, double-click it in the overview. The **Synchronize** window will be opened and the tender details will be displayed in a clearly arranged table. It contains four or six areas: INFORMATION NOTICE, MESSAGES, TENDERING DOCUMENTS, BIDDING DOCUMENTS, PARTICIPANT COMPETITION DOCUMENTS, PARTICIPATION REQUESTS. These are separated by horizontal bars displaying different symbols.

Switch the displayed area by clicking the separation bar. The content is moved up or down and the content of your chosen area will be displayed below the separation bar.

Figure 7.2: Tender - Information notice

When using the INFORMATION NOTICE button, you will be forwarded to the tendering portal and can view the information notice text on the platform.

Figure 7.3: Tenders - Forwarding to tendering portal

### 7.1 Messages

In the MESSAGES section, all messages of the current tender are visible at one glance. Update the message inbox using the SYNCHRONIZE button.

Here, you can also send your own requests to a tendering authority. Click the NEW MESSAGE button.

Figure 7.6: Tenders - Tender documents for goods and services

The tendering documents can be displayed, printed or exported, but not be edited. Open a single document by double-clicking.

Before opening tendering documents for the first time, all documents have the status "*Unread*". After opening the document's status changes to "*Read*". If all files have been opened at least once, the green status "*Read*" is adapted by the respective version of the tendering documents.

If necessary, export single versions of the tendering documents as ZIP archives by selecting the EXPORT menu.

If the awarding authority has uploaded an updated version of the documents you will be informed about this by a new window.
Important not	te! X
	New version of tendering documents
	The awarding authority has published a new version of tender documents. Please note that existing bids, which refer to previous versions, are considered obsolete and should no longer be submitted. Please create a new bid. If necessary, you can reuse already edited documents and assign them to the newly created bid via drag & drop.
	🖉 ОК

Figure 7.7: Tenders - New version of the tendering documents

# 7.3 Creating a bid

In order to create a bid, you have to switch to the bidding documents area which can be found in the tender's detailed view under BIDDING DOCUMENTS. An initial version of the bid will be created after the tender has been opened for the first time. You can open and edit the bid by double-clicking it or, if necessary, create further bids by clicking the CREATE button.

Already exisiting, but not yet submitted bids are displayed with a green symbol in the **AI BIDDING**COCKPIT. Submitted bids are blue.

Figure 7.11: Tendering details - Navigation with arrow keys

You can comfortably navigate through the tendering documents using the arrow keys.

- ARROW UP and DOWN select the element
- ARROW LEFT closes the selected element. If the element is already closed or cannot be closed, the element above it is automatically selected. This way you can close all directories outside of the tendering documents by repeatedly using ARROW LEFT
- ARROW RIGHT opens the selected element. If the element is already opened or cannot be opened, the element beneath it is automatically selected. This way you can open all directories of the tendering documents and view the content documents by repeatedly using RIGHT ARROW
- By using SPACE, the activated element's state is reversed. That is "closed" is "opened" and vice versa.

#### 7.3.2 Insert with Drag & Drop

Using the drag & drop function allows you to comfortably add one or several files to your bids and participation applications. You can also move bids and participation applications or accept files for review.

A file can be moved with pressed left mouse button to the target object. All objects open for drag & drop are marked with a PLUS sign next to the cursor

Moving and inserting files is possible in the following cases:

• Within various versions of bids and participation applications

New version	olementary 🤳 🌛	Import files

Figure 7.14: Insert files with Drag & Drop - from tendering documents

You can scroll up and down if you move the cursor to the upper or lower frame of the window, holding down the left key of your mouse.

### 7.3.3 Forms

Forms have a light gray background with white entry fields and coloured mandatory fields.

You can identify forms that can be filled out on the screen by the \*.aiform ending.

Form view		
	c) Deposits and guarantees required:	▲ 
	d) Main terms concerning payment: (EN) *	
	e) Qualifications required by law: (EN)	
	4. Place and period of performance:	
	a) Place:	
	(EII)	
	Official name:	
	Postal address:	•
~ <u>~</u>	Save Save	<mark>⊘</mark> К

Figure 7.15: Form with mandatory fields

The following field types can occur in the forms:

Form field	Example	Meaning
Option field	○ YES  NO	Offers one or more options, of which only one can be selected. The selected option has a green dot in the circle, e.g., Yes/No field.
Check box		Activate (green checkmark) or deactivate (empty box) via click- ing.
File field		Add external attachment files to the form. From left to right: Attach file, Display file content, Delete file.

Form field	Example	Meaning
Entry field	Restricted tender	Mandatory fields have a coloured background. Optional fields have a white background and fields containing display functions are adjusted to the background colour. Mandatory fields can also be identified by the red asterisk (*) next to the field name. The entries can be checked for certain aspects, e.g. numbers only. When making adjustments to the text field, the number of characters already entered is displayed. This should prevent too long texts, which cannot be displayed in the printed version.
Selection list field		If there is a magnifying glass symbol right next to the entry field, a selection list with possible entries can be opened by clicking. Manual entries are also allowed in this field.
Date field	11.07.2014	Clicking the symbol to the right opens a monthly calendar, in which you can navigate through the months or years by using the arrow buttons. The date can be entered by clicking the calendar or with direct keyboard entry. Date values in the <b>DD.MM.JJJJ</b> format are expected.
Selection field	Tendering unit	Only the selection from this list is possible.

If the form is longer than one screen page, you can move its content up and down with the SCROLL BAR or the ARROWS on the right side.

Click PRINT FORM on the lower left margin of the form if you wish to print the form or save the form as a PDF file.

The three buttons on the right can also be selected with key shortcuts, e.g. [ALT] + [S] for SAVE. Clicking OK checks the entries in the fields and displays any errors.

### 7.3.4 Specification sheet

Open the specification sheet by double-clicking or using the OPEN action.

The **Specification sheet** window has its own symbol bar (1) and three different areas: the structure (2) on the left, the table view (3) on the upper right hand side and the form area (4) below. These areas can be adjusted in size using the two area separation bars with. They can also be hidden or shown using the three DISPLAY buttons (STRUCTURE, TABLE VIEW, FORM VIEW) in the symbol bar (1).

The symbols contain a tooltips. That is the name of the symbol appears in a blue text field below the cursor if you place the cursor on a symbol without clicking.

The following symbols are included:

Symbol	Meaning
	Saves the current entries.
Validate specification sheet	Checks the entries and the specification sheet structure for incomplete manda- tory fields and errors.
	Record change: Only displayed if supplementary bids/variants are enabled. Allows to record changes to the specification sheets of the supplementary bids/variants.
	Delete change: Only displayed if supplementary bids/variants enabled. Deletes changes to the specification sheets of the supplementary bids/variants.
<u>e</u>	Selects the superordinate element in the specification sheet. Only active if the selected element is not in the top level and the structure is inactive.

Symbol	Meaning
	Show or hide selection. Only visible in structure.
Z Next mandatory field	Jumps to the next empty mandatory field. Alternative: the [F3] key.
<mark>č</mark> ‡∙ Tree	Opens or closes the structure view (2). The vertical separation line can also be moved with the mouse.
	Opens or closes the table view (3). The horizontal separation line can also be moved with the mouse.
■ Page 2 of 7 ►	Opens or closes the form view (4). If <b>only</b> the form view is displayed, ad- ditional symbols appear on the symbol bar which you can use to navigate through the specification sheet. Click on the arrow buttons or enter the desired page number in the white entry field and confirm your entry with [RETURN].

The structure (2) gives a structured overview over the specification sheets. By clicking the + and - symbols next to the folder symbols, you can expand or close the displayed list.

The table view (3) contains a tabular overview over the single items and groups. In the form view (4), you can see all fields of the active item (which is marked in the table structure) and make any desired changes to it.

The information bar YOU ARE HERE below the symbol bar gives you a quick overview over the position within the specification sheet you are currently at.

You are here: Specification sheet / <u>1 Lot : Item / Default rating scheme / <u>1 Price gross (100%, Disqualification)</u> Figure 7.17: Information bar in the specification sheet</u>

The bar shows the current element as last from left to right. By clicking the links, you can quickly switch to the superordinate specification sheet hierarchy steps.

Symbol	Meaning
••	All item types: Add to the specification sheet on the top level or to groups and sub-items.
· 🔤	Classification level: Group of items or alternative items.

Price criterion: Included by default in the rating scheme.

For a better orientation, the elements of the specification sheet have got different symbols:

Item or classification level for lots: Only available in specification sheets with lots.

· 🕰

€

Symbol	Meaning
•?	All question types: Are added to questionnaires.

Before saving, the integrated plausibility check shows you possible errors by displaying the fields in question with a yellow warning symbol.

If you hover over the corresponding warning symbol with your mouse without clicking, a tooltip containing information about the missing entries is displayed.

Figure 7.19: Warning about invalid VAT

If the red mark has not disappeared after the errors have been corrected, click on the VERIFY button in the symbol bar.

The rating scheme contains all rating criteria published by the tendering authority, as well as possible tender-specific questionnaires.

### 7.3.5 GAEB specification sheet

For editing GAEB files, please refer to the chapter GAEB configuration.

## 7.3.6 Lot bids and single lot bids

If the specification sheet of a tender contains several lots the tendering authority determines whether bids can be submitted for **one** lot, for **several** or for **all** of them.

You only need to fill out the required lots in the specification sheet while creating your bid.

The bid submission with lot tendering can also be set to lot-based by the tendering authority. For every lot that you wish to submit a bid to, a complete bid containing all documents which ought to be transmitted is created in the **AI BIDDING**COCKPIT.

If you create such a single lot bid, the lot selection is presented to you in an additional window.

Lot selection
Please select a lot.
1 Lot: Office equipment
2 Lot: Cleaning service

Figure 7.20: Lot selection - Extract

The new version of the lot bid already contains all files required for the bid submission by default. When you open the specification sheet from the single lot bid, the following message is displayed.

	Info		×
You can view the complete specification sl	neet in the tender do	cuments.	
Do not display this message again			<u>0</u> K

The specification sheet of the single lot bid contains the selected lot only. You can view the complete specification sheet in your tendering documents.

All further procession steps of a lot are identical to those of a bid without lot split.

### 7.3.7 Flexible qualification verification

Tendering authorities have the option to define their own criteria which help to decide whether the bidder is accepted or refused in the verification phase.

In this case, the *questionnaire for qualification verification* is included in the tendering documents and in every bid or participation request.

The questionnaire is composed similarly to the rating scheme of the specification sheet. That is, it contains criteria groups and single criteria with questions to answer.

Tender overview V Cleaning servi	ces Evaluation questionnaire	
Evaluation questionnaire		
🥝 Validate specification sheet 🛛 🖄	Image: Section of the section of	- Tree 🗎

	Is exclusion criterion	⊙ YES ◯ NO
Preview		Save Cancel OK

Figure 7.23: Bid with flexible qualification verification

After you have filled out the criteria and answered the questions, you can save your entries.

The filled-out questionnaire will be sent digitally, or printed and sent via postal mail to the tendering authority along with the other tendering documents.

### 7.3.8 Implement test signature

You can check if your card reader and signature card are compatible to the **AI BIDDING**COCKPIT before the bid submission.

For this use EDIT - ADD TEST SIGNATURE

The panel **Perform compatibility check** shows additional information. Follow the panels instructions.

Perform Comp	patibility Check	×
	Here, you can check the compatibility between your signature hardware (card reader and signature card) and the <b>AI BIDDING</b> COCKPIT.	
	The following steps will help you to attach a test signature. You can see the result of this test afterwards.	
	Please note that this test merely refers to the <b>technical compatibility</b> between the signature hardware and the <b>AI BIDDING</b> COCKPIT. There will <b>not</b> be any verfication of the signature certificate on your signature card.	
	Please insert your signature card into your card reader and confirm by clicking "OK".	
	Ok Cancel	

Figure 7.24: Performed compatibility check for card readers or signature-cards

The check's result is displayed in another panel.

The inserted <b>BIDDING</b> CO therefore po	signature card and the card reader are compatible with the <b>AI</b> XPIT. The installation of a signature (e.g. for bidding submissions) is ssible!
However, the Please ensur	signature card did <b>not</b> undergo a verification of its signature certificate that your signature is valid for the date of the bid submission.

Figure 7.25: Positive result for the compatibility check

## 7.3.9 Editing PDF files

When opening PDF files, an information notice about the handling of PDF files that ought to be edited and their storage location is displayed. Activate the checkbox DO NOT SHOW THIS DIALOG AGAIN in order to deactivate this notice.

Editing PDF Fil	es	×
<b>()</b>	The PDF file will now be opened with the linked PDF program and can be edited with it on demand. The filled out PDF file will afterwards be saved to your temporary work folder: C:\Users\hpelz\BCockpit\My Bids	
	Please overwrite already existing files with the same name here!	
🗌 Do not sh	ow this dialogue again	
	✓ O <u>k</u>	

Figure 7.26: Note for PDF files

Ě
---

The PDF file is opened in a temporary workspace and needs to be saved to the same spot with the same name after editing. When changing to the overview over tenders or when ending the software, the **AI BIDDING**COCKPIT will ask you to save your current changes. This deletes the content of this temporary directory.

You can change the storage location of this repository at any time under SETTINGS - GENERAL SETTINGS - CHANGE TEMPORARY WORKSPACE. Please note the information in chapter General settings

### 7.3.10 Editing bids with several bidders from one company

**AI BIDDING**COCKPIT enables you to edit a bid with several users on different Computers, if they are registered as Employees of the same company on the **AI TENDERING**PORTAL.

The following **Example scenario** explains this function in depth:

Employee A edits a file in the **AI BIDDING**COCKPIT and saves the changes.

# 7.4 Creating a sidebid

Supplementary bids/variants are autonomous business objects in the **AI BIDDING**COCKPIT, which can be verified and rated individually. Supplementary bids/variants can be created for a primary bid, where they apply to the **full service** or a **partial service** of the primary bid. In addition to this, a supplementary bid/variant can be created without a primary bid.

If the tendering authority accepts supplementary bids/variants in their tender, an additional button is displayed in the bid overview: CREATE NEW SUPPLEMENTARY BID/VARIANT.

Figure 7.31: Select sidebid type

The following table contains an overview over all possible actions or buttons and their meaning in the bid overview and detailed view.

Button / Action	Meaning				
Create new <u>s</u> upplementary bid/variant	Opens the window <b>Select sidebid type</b> , where you can choose the type of your sidebid. Is only displayed if supplementary bids or variants are allowed. Shortcut: [ALT] + [S]				
<u>D</u> etail view	Opens the detail view of the bid documents for editing. Shortcut: [ALT] + [D]				
S <u>u</u> bmit	Opens the <b>Select submission type</b> window. You can submit several supple- mentary bids or variants without primary bid in the <b>AI BIDDING</b> COCKPIT if the tendering authority has activated this option. For further information, see the Digital bid submission chapter. Shortcut: [ALT] + [U]				
С <u>о</u> ру	Creates a copy of the selected supplementary bid or variant. This way you can make small changes without having to create an entirely new bid, e.g. when you withdraw an invalid bid from the Tendering Portal. Shortcut: [ALT] + [O]				
D <u>e</u> lete	Deletes the selected supplementary bid or variant after a warning. Shortcut: [ALT] + [E]				

© Administration Intelligence AG, 2020 - All rights reserved.

Button / Action	Meaning			
<u>R</u> ename	Opens the <b>Bid name</b> panel. Here, you can change the bid title. Shortcut: [ALT] + [R]			
<u>P</u> rint	Prints all or single tender documents. Shortcut: [ALT] + [P]			
<u>H</u> istory	Opens the <b>History</b> window. See also Qualified signature with smart card. Shortcut: [ALT] + [H]			
Import files	You can add your own documents to your supplementary bid or variant documents. To do so, select the desired file in the <b>Import file</b> panel and then select IMPORT. The file will be added to the list of the bidding documents and is displayed below the ATTACHMENTS folder. Shortcut: [ALT] + [I]			
Ope <u>n</u>	Displays the selected file's content. You can return to the bid detail view via the blue link. Shortcut: [ALT] + [N]			
E <u>x</u> port	Only activated in certain documents, e.g. the <i>Specification sheet</i> . The imported aidf file can be edited externally from the <b>AI BIDDING</b> COCKPIT, e.g., with the <b>AI LV</b> COCKPIT, and then be reimported into the <b>AI BID-DING</b> COCKPIT. Shortcut: [ALT] + [X]			

The gray symbols of side bids differ in their meaning. The sidebid without main bid has the same folder symbol as the bid because it was submitted and evaluated as an individual bid. The symbol of the side bid on a main bid symbolises an additional paper which is placed in the main bid's folder.

While supplementary bids with main bids are located in the TENDERING TREE underneath the bid, supplementary bids without a main bid are located on the same level as the bid.

Figure 7.32: Supplementary bid/variant without main bid

Depending on which Specification sheet is part of the tender, the supplementary bids are recorded differently. The following explains the individual types of side bids in detail.

### 7.4.1 Supplementary bid with complex specification sheet

This type of supplementary bids and variants applies to all tenders where the AI SPECIFICATION SHEET is used.

#### 7.4.1.1 Supplementary bid for a primary bid with complex specification sheet

When a supplementary bid/variant is created for a primary bid using the ADD SUPPLEMENTARY BID/VARIANT button, the SPECIFICATION SHEET and - if applicable - the QUESTIONNAIRE FOR QUALIFICATION VERIFICATION of the primary bid are copied as well. This means, every main bid has a specification sheet with all entries of the primary bid by default. The changes can be made to certain levels (specification sheet, lot, group or item).

Figure 7.38: Record changes for supplementary bid wihtout main bid

In addition to the amount of change (NET or GROSS and VAT), you will also be asked to enter a SUPPLEMENTARY BID TITLE and a REASON FOR THE CHANGE here.

This bid type must not be submitted in addition to a main bid. That is, you cannot attend a rating with a **primary bid** and a **supplementary bid without a primary bid** at the same time.

## 7.4.2 Supplementary bid/variant with external specification sheet

You will find this type of supplementary bids especially in Construction service tenders and all tenders containing an external specification sheet (e.g., a **GAEB** file).

### 7.4.2.1 Supplementary bid/variant for a primary bid with an external specification sheet

In contrast to the supplementary bids and variants in tenders (where changes are recorded in the AI SPECIFICATION SHEET), tenders with an external specification sheet, allow you to create the following three types of supplementary bids:

- 1. **Changed amount** (change proposal): Applies to a part of the service and is indicated by an amount of change (+/-). You can record as many change-proposals as you wish in order to increase the amount of alternatives for combinable bids.
- 2. **Total** (special proposal): Applies to all announced services and is indicated by a total amount. You can create several special proposals for the service. They will appear as

individual bids in the rating.

3. **Conditional discount**: This supplementary bid has got no amount and is only relevant in combination with its primary or combined bid. To provide you with as much flexibility as possible, you only have to enter the bid type and gather the content and its effect on the price in the corresponding text field or add your own document.

It is possible to combine the main bid with one or more corresponding supplementary bids of the AMOUNT OF CHANGE kind in the **AI BIDDING**COCKPIT. The resulting **Combined bids** are checked and rated as individual bids. This ensures that you can appear with several versions of your bid in the rating at the same time. In addition to this, a supplementary bid of the CONDITIONAL DISCOUNT type can increase your chances of acceptance if it is linked to a combined or primary bid.

Create a supplementary bid for a primary bid in the tender detail view using the ADD SUPPLE-MENTARY BID/VARIANT button.

Depending on the selections made in the TYPE field, different entry fields are displayed to you in the lower area of the window. The TYPE list field is set with CHANGED AMOUNT as default.

Figure 7.39: Create supplementary bid for a main bid

In tenders with lots, you have to select a lot from the list. The field containing these lists is not displayed if the tender does not have lots.

If necessary, edit the text in the DESCRIPTION field and fill out the mandatory fields: NET or

GROSS TOTAL, VAT and REASON. Change proposals also allow **negative** numbers in number fields.

Add further documents to your supplementary bid via the IMPORT FILES button.

You can create different supplementary bids for a main bid. These will be submitted along with the primary bid.

### 7.4.2.2 Supplementary bids without main bids with an external specification sheet

Instead of the required bid, you can also offer an **entirely different service** using the CREATE SUPPLEMENTARY BID button in the BID DOCUMENTS area.

This type of bid must not be submitted alongside a mainbid. That means, you cannot be simultaneously present in a main- as well as a sidebid.

Figure 7.40: Record supplementary bid without main bid with an external specification sheet

Aside from the external specification sheet of the tendering documents, a supplementary bid without primary bid contains the same documents as the primary bid. Editing these documents is identical to editing a primary bid. See also the Creating a bid chapter.

Optionally you can add further files to your supplementary bid/variant without primary bid. As soon all required documents are complete, submit the supplementary bid by using the SUBMIT button.

This bid type must not be submitted along with a main bid. That is, you cannot appear in the rating with a main bid and a supplementary bid without a main bid at the same time.

# 7.5 Digital bid submission

After you have processed the bid files, click on the SUBMIT button if you wish to start the submission of your bid.

In the selection window **Select way of submission**, the advantages and disadvantages of the different submission types are presented.

Figure 7.41: Selecting bid submission type

Select DIGITAL SUBMISSION and accept your selection with OK.

Figure 7.42: Selecting of the signature type

Another selection panel opens, where you can select your signature type for your bid:

- NO DIGITAL SIGNATURE (IN TEXT) or
- DIGITAL SIGNATURE

Examples for NO DIGITAL SIGNATURE (IN TEXT) or the submission type DIGITAL (IN TEXT) are for example the bidder's scanned signature or the record of the bidder's full name.

An internal check of the bidding documents is performed. See chapter Bid verification before submission.

### 7.5.1 Bid verification before submission

The bid submission of the AI BIDDINGCOCKPIT consists of several consecutive steps.

The first step is checking the documents for completeness.

Tender overview  Framework agreement 3 lots 2015/1 Bid 2 Bid 2 Bid submission				
Bid verification (Step 1 of 2)				
All mandatory fields have been filled in. The tender documents are up to date. The Bid documents can now be submitted.				
	Cancel			

Figure 7.43: Step 1: Bid verification with complete mandatory entries

If mandatory entries are missing, a **red** error message is displayed and the bid submission cannot continue.

<u>Tender</u>	overview V puq-20150127-V0L-0039 V Bid submission
Bid ve	erification (Step 1 of 2)
6	The Bid documents are incomplete. Please read the notes below and complete the Bid documents, before you attempt another Bid submission.
8	The form 'VOL_ANGEBOTSSCHREIBEN.aiform' has not been filled out completely.
	In the specifucation sheet (Leistungsverzeichnis.aidf) mandatory entries (prices, descriptions, etc.) have not been made. However, if you do not wish to bid for all lots, it is acceptable to leave out certain entries.
1	The file (Leistungsverzeichnis.aidf) included in the Bid documents has neither been imported nor edited yet. Usually, parts of the Bid must include entries by the bidder.
	Continue

Figure 7.44: Step 2: Bid verification with incomplete mandatory entries

If optional entries are missing (e.g., in the specification sheet), a **yellow** warning message appears. After you have confirmed the notification text in the checkbox on the lower left hand side, you can proceed with the bid submission.

The **blue** information texts do not influence the bid submission. They usually apply to the PDF files of the bidding documents and must be read before bid submission.

id ver	ification (Step 1 of 2)			
3	The Bid may be incomplete, or important documents may not be filled out. Your Bid may therefore be excluded from the tender. Please be sure you would like to submit the Bid in this state.			
	in the specification sheet (Specification sheet.aidf) mandatory entries (prices, descriptions, etc.) have not been made. However, if you do not wish to bid for all lots, it is acceptable to leave out certain entries.

Figure 7.47: Accompanying ticket in the bid verification

Click SIGN and select one of the options for your signature.

You can either use a **card reader with a smart card** or a **soft certificate**, which has been provided to you in file form by a certification service provider.

You can find information on the two signature procedures in the following chapters: Qualified signature with smart card and Advanced signature with soft certificate.

Figure 7.48: Select type of electronic signature

The added signature's certificate is displayed in the bottom area of the accompanying ticket and can be verified, displayed or deleted with the corresponding links.

The programmed certificate check refers to the **validity duration** of the certificate. An attention note opens up if the used certificate has expired. You can still submit the bid, however.

	×
Question	
 The certificate used for signing this bid or participation application does not meet its validity date (it is either not yet valid or has already expired). Would you still like to sig with this certificate?	gn
Yes X No	

Figure 7.49: Warning of expired certificate

If necessary, you can add further signatures to your documents by using the SIGN button. Additional signatures are listed below the first signature.

Figure 7.50: Accompanying ticket with additional signatures

Click SUBMIT to start the submission of the tendering documents to the Tendering Portal. After the successful submission, the **History** window is displayed. It confirms that the awarding authority has received the bidding documents.

Within the TEXT, HTML and SIGNATURE tabs, you can verify this important receipt or save it locally on your computer via the EXPORT HTML and EXPORT TEXT buttons.

After submitting the bid, important information on your bid are contained in the **Signed Bid data.txt** text file. Such information are for example all contained documents. You may open the file for display at any time.

### 7.5.2 Qualified signature with smart card

If you possess a card reader with a valid smart card, click on SMART CARD in the **Select signature type** window and follow the instructions on the screen for selecting a card reader and an interface.

In the following window, you will be asked to enter your PIN:

Info	×
Please note the prompt on your card reader after closing this window, and then enter your signature F	YIN.
<u></u> K	

Figure 7.51: PIN entry smart card

After you have entered your PIN, the qualified signature will be displayed in the lower area of the accompanying ticket and can be verified, displayed and deleted using the corresponding links.

You can find further information on supported card readers under INFO - SUPPORTED SIGNA-TURE CARDS.

## 7.5.3 Advanced signature with soft certificate

The **AI BIDDING**COCKPIT also supports digital signature with soft certificate.

Click on SOFT CERTIFICATE in the **Select signature type** window, then select the certificate file in \*.**p12** format or in \*.**pfx** format within the **Open file** panel and click OPEN.

If you have not stored a file in the SETTINGS - GENERAL - GENERAL SETTINGS area, the **Save soft certificate** panel will be displayed.

Storage of so	ftware certificate
	Permanent storage of software certificate
	You have the possibility to permanently store the used software certificate for your user. This has the advantage that the certificate does not have to be selected from the hard disk every time a signature is placed. The stored software certificate can be changed in the general settings at any time.
	Would you like to permanently store the certificate now?
1	
	🔮 <u>Y</u> es 🛛 🗙 <u>N</u> o

Figure 7.52: Permanent storage of the soft certificate

Click YES if you would like to permanently store the selected certificate.

You will be asked to enter your password.

Entry of signature PIN

The tabs to the right of the protocol area (TEXT, HTML and SIGNATURE) serve to verify the submission, or to save the receipt locally on your computer via the EXPORT HTML and EXPORT TEXT buttons.

## 7.6 Bid submission with external signature

To provide more flexibility for signing digital bids, the **AI BIDDING**COCKPIT supports the signature with an external software. A comfortable assistant guides you through the bid submission process with EXTERNAL SIGNATURE and enables you to export PDF files which can be signed according to the law for all bid components and be submitted along with the bid after the import.

After you have edited your bidding documents, click SUBMIT if you want to start the bid submission.

Select the option field ELECTRONIC SUBMISSION in the **Select submission type** window and click OK. You might have to select EXTERNAL SIGNATURE in another window.

Figure 7.57: Select external signature

### 7.6.1 Bid document verfification

The first step of the bid submission with external signature is checking for completeness of the bidding documents.

Electronic signatures

📅 Print 🔥 Share

According to Article 7.3 of the General Conditions of Tender, for electronic bids, a qualified electronic signature (QES) is required. A qualified electronic signature is an electronic signature that:

- is uniquely linked to the signatory;
- is capable of identifying the signatory;
- is created with means which the signatories can, with a high level of confidence, use under their sole control;
- is associated with the electronic document to be authenticated in such a way that any subsequent change in the data is detectable;
- is created by a qualified electronic signature device and is based on a qualified certificate meeting the requirements of elDAS Regulation (Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC).
   See the following link

Figure 7.63: Suggestions for implementing an external signature

#### 7.6.3 Importing a signed table of contents

Before you carry out this step, you must sign the file you exported in the preceding step (*Tableofcontents.pdf*) with a signature program of your choice. Afterwards, you can import the signed document to your bidding documents.

Tender overview ▶ Consultancy Services ▶ Bid submission		
Import tender cover sheet/table of contents (Step 4 of 4)		
Import the signed document. If you would like to attach several signatures of different persons to the document, you can pause the process and continue it at a later time using the "Pause" button.		
Import directory of the tender cover sheet/table of contents		
Please select the signed document which ought to be imported. File: C:\Users\hpelz\Desktop\Table_of_contents(signiert).pdf Further information on adding the signature

Figure 7.65: History - External signature: Protocol information

Due to technical reasons, the signed *Tableofcontents.pdf* is only valid for import if the assistant has not been cancelled or restarted after the export. All bid submission steps must be carried out **without interruption**. Therefore, you have to be familiar with the signature function of your application before starting the bid submission.

If you cancel the assistant for bid submission in any of the steps with the CANCEL button, the validity of the exported table of contents is lost.

Each time the assistant is opened, a new *Tableofcontents.pdf* is created and must be exported and reimported after the external signature has been added. Only then can you proceed with the bid submission.

# 7.7 Cover sheet procedure

If the tendering authority enabled bid submission with cover sheet procedure for their tenders, a further type of digital bid submission - apart from the submission with digital signature - is made available to you in the **AI BIDDING**COCKPIT. Here, a PDF document called the **cover sheet** is created alongside with the bid. It contains a check sum which is automatically calculated from

the bid.

This way you have the possibility to submit your bid digitally to the tendering authority even without a smart card and a card reader or a soft certificate.

### 7.7.1 Bid submission with cover sheet

After you have edited your bidding documents, click SUBMIT if you like to start the bid submission.

Select the option COVER SHEET PROCEDURE in the **Select submission type** window and click OK.

The bid submission via cover sheet procedure is mostly identical to the submission of an electronic bid, which is described in the Digital bid submission chapter.

After a successful verification of the bidding documents, the following message is displayed before you submit the bid.

A	Information
	The cover sheet has been created. After a successful submission, the PDF will be opened, which you can print and send to the tendering authority for confirmation.
	🖉 ОК

Figure 7.66: Information message for the cover sheet before submitting

The printout of the created cover sheet is only possible **after** the submission of the corresponding bid. This ensures that cover sheets are only sent with bids, that have also been submitted electronically.

After the successful submission, the submission type (cover sheet) is displayed in the **History** panel. In the TEXT and HTML tabs, you can verify this important receipt and save it locally to your computer using the EXPORT HTML and EXPORT TEXT buttons. The SIGNATURE tab is not available here.

After successfully sending the bid, the content of the *Coversheet.pdf* file is displayed. You can save this document with FILE / SAVE UNR to your Computer.

Print the cover sheet, sign and submit it via postal mail to the tendering authority. Here it is verified whether the check sum of your cover sheet corresponds to that of the decrypted digital bid.

### 7.7.2 Bid withdrawal with cover sheet

Bids which have been submitted with cover sheet procedure must - if necessary - be withdrawn the same way. The bid withdrawal is mostly identical to the bid submission.

To withdraw a bid, select the WITHDRAW command in the ACTIONS area or in the context menu. In every step of the bid verification, you can cancel the process or proceed with CONTINUE.

Before you submit your withdrawal, the information message about the creation of the cover

sheet for your withdrawal is displayed again. After the successful submission, the receipt for the bid withdrawal is confirmed in the **History** window.

In the TEXT and HTML tabs, you can check the submission receipt and save it locally to your computer via the EXPORT HTML and EXPORT TEXT buttons. The SIGNATURE tab is not available here.

Bid verification (Step 1 of 2)				
The Bid documents can now be withdrawn.				
	Cancel			

Figure 7.69: Step 1: Bid withdrawal with cover sheet

	The accompanying ticket contains a list of all files submitted, as well as information about the tender. It is submitted along with the documents as well as saved in the documents.		
	Please verify all values and confirm by ticking the corresponding checkbox. Then, you have the possibility to add signatures or to generate a cover sheet.		
	Hereby I confrim that I withdraw the submitted bid.		
My submitted bid will be automatically marked as withdrawn as soon as this message has been signed and received by the tendering authority.			
I have	e read the accompanying ticket above		

Figure 7.70: Step 2: Bid withdrawal with cover sheet

Along with the withdrawal comes a withdrawal message, which is forwarded to the tendering authority. The bid is then automatically marked as "withdrawn". The tendering authority then makes a legally valid confirmation of the withdrawal based on the check sum of the withdrawal cover sheet you have sent.

After the successful submission of the withdrawal, the file *Coversheet\_Withdrawal.pdf* is opened with a new check sum. You can save this document with the menu command FILE / SAVE AS to your desired directory on your computer.

Figure 7.71: History - Cover sheet withdrawal: Protocol information in the Text tab

Print the cover sheet for bid withdrawal, sign it and submit it to the tendering authority via postal mail. After the bid opening, it is verified whether the check sum of your cover sheet corresponds to that of your withdrawn electronic bid.

# 7.8 Print bid

You can always print single or all files. It does not matter if the bid has been submitted digitally or sent to the awarding authority per postal service.

Print files		
In this overview, you have the possibility to print single co	mponents of the bid.	
File name 🛆	File size	Actions
General Conditions of Contract.pdf Offer\1\General Conditions of Contract.pdf	117 КВ	Print 💌

Specification Sheet.aidf offer\1\Specification Sheet.aidf	52.3 KB	🗊 Print 🔻

Figure 7.72: Tenders - Print bid

To do so select the context menu or the PRINT action in the bid's overview. The **Print file** panel is opened. Select PRINT ALL in order to print the entire bid or select a file from the list and select PRINT for single printouts.

# 7.9 Exporting bidding documents

The EXPORT BID button in the detail area and the symbol bar is only active if enabled by the tendering authority. Similar to the digital bid submission, the bidding documents are composed and encrypted by the **AI BIDDING**COCKPIT, and the **Sign files** window opens. Confirm that you have read the accompanying ticket by ticking the checkbox below the text and click SIGN. Follow the instructions on the screen and add a signature to the documents. When you then click SUBMIT, the **Save file** window is opened, where you can select a storage location for your file.

You can send the created bid to the tendering authority on a digital data storage medium or via email, where it can be imported into the **AI TENDERING**MANAGER application.

You cannot digitally withdraw an exported bid. If necessary, inform the tendering authority.

# 7.10 Participation request

In a two-step procedure with competitive participation, two additional separation bars are displayed in the TENDERS area of the tender detail view: the PARTICIPATION REQUEST DOCUMENTS and the PARTICIPATION REQUESTS.

To edit a participation request, click PARTICIPATION REQUESTS. A first version of the participation request is created when the tender is opened for the first time. You can open and edit this participation request or, if necessary, create further participation requests using the CREATE button.

The participation requests usually contains bidder-specific documents only.

Participation requests

Participation request 2	Version 13	-	27.08.2018 12:24:11	Completed	Submit 🔻	
🔁 Attachment.pdf		43.4 KB		Imported	🕢 Open 🗢	

Figure 7.73: Tenders - Create participation request

In some cases, you will find a *questionnaire for qualification verification* with questions by the tendering authority here. You will need to fill this out. You can add as many own files or proofs to your participation request as you like using the IMPORT FILES interface.

If all required documents are available, click SUBMIT in order to submit your participation request.

The participation request submission is carried out analogously to the bid submission. You can find further information in section Digital bid submission.

Participation requests - like bids - can be withdrawn and submitted again. You can find further information in section Withdraw bid.
